

Environmental and Sustainability Policy

P202

Policy Statement

Ace Connections is committed to environmental sustainability and high standards in all operations. We will maintain and improve our Environmental Management System, comply with legislation and guidelines, and set performance objectives for continual improvement.

We prioritise energy and water efficiency, and responsible travel practices. We take appropriate action to reduce, reuse and recycle raw materials, minimise waste and use all forms of resources efficiently. Pollution prevention is ensured through risk assessments and stakeholder collaboration to meet local needs. We protect and preserve local environments, respecting the indigenous flora, fauna and wildlife. We predominantly work with a local supply chain to support the community within a 65-mile radius of our Cambridgeshire office to help reduce the environmental impacts associated with our products and services.

Ace Connections integrates sustainability throughout the organisation, allocating sufficient resources to achieve our goals of environmental protection.

We expect the same high standards from our contractors, suppliers, and business partners. This policy is accessible to all employees and contractors, with global communication for any amendments. Compliance will be monitored, and training sessions may be conducted based on findings.

This policy, approved by Senior Directors, will be reviewed annually with recorded amendments.

Approved by:

Andrew Butcher
Director
ACE Connections

Chris King
